

## Global Neighbors Spring 2020 Update

With the unexpected passing of our secretary, Kai, we established an Education Fund for Kai's 2 young children. Kai's husband Kai Sorn, is very happy to hear that we have raised \$20,000 for the future education of their children. Kai Sorn is a Computer Teacher in the Village Middle School. We have made several important adjustments to our Mae Pa Office. Our Accounting company has designated Nook, a Senior Accountant to the Global Neighbors file. She is doing an excellent job. We have also employed a new contractor, Mr. Thanakon who is exceeding our expectations. The quality of his work is amazing!

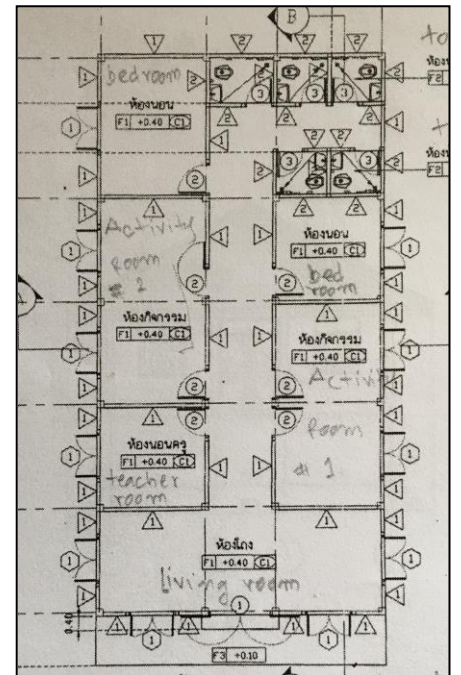

### Current Projects:

#### Girls Dormitory at our Ko Koh Orphanage

Mr. Thanakon

We are currently looking after 32 children in our Ko Koh Dormitory. The older children are at the age where we need to have separate sleeping quarters. This new building will also be the residence for the caregiver. We have included 3 washrooms and 2 shower areas.

This construction will be finished by September with the Grand Opening in November.

This project is fully funded thanks to our generous donors!

#### Higher Education Facility at Thoo Mwey Khee

Global Neighbors has been working with TMK for many years. We appreciate the dedication of the staff and volunteers who are providing a superior education to their students. Many of their graduates are teaching in the village schools we have built in Myanmar.

TMK is offering advanced education up to a Liberal Arts Degree. The interest in continued higher education has been enormous with over 250 students already on site. They are using tents as classrooms and at time when the weather is too hot, they moving into the forest into an open air classroom.

Global Neighbors is building a large Lecture Hall with 8 large classrooms which will facilitate 240 Students.

The hall construction is funded, however **we are looking for donors** to help with the construction of toilets as well as some classroom furnishings and equipment like, White Boards, Desks and 25 computers.

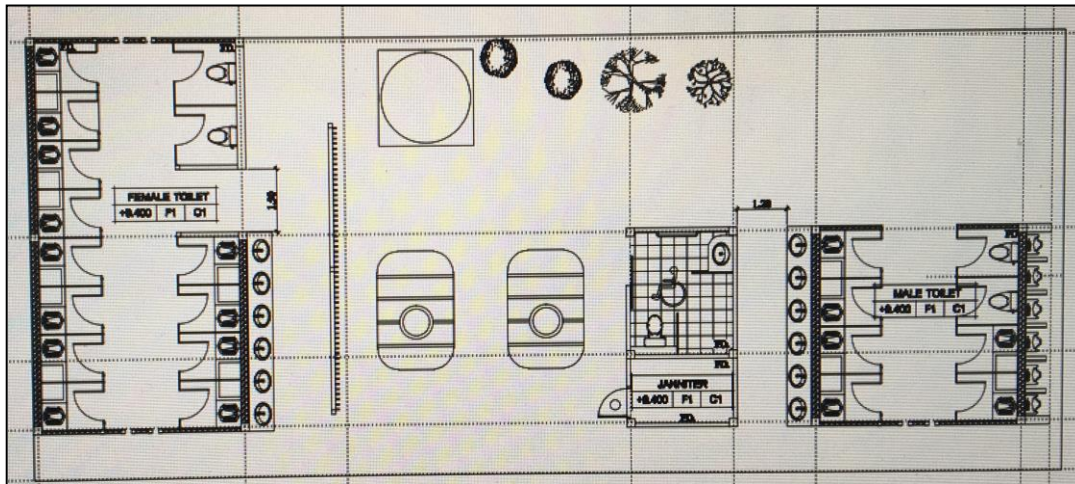

**Cost of Toilets:** \$25,000

**Desks :** \$10,000

**Computers:** \$15,000

New Lecture Hall
